FACILITY DUDE

Online tools to manage your facilities.

FacilityDude is a leading provider of cloud-based operations management software designed for the unique needs of local, state, and federal governments. FacilityDude's software automates workflows, and provides simple reporting to protect your assets. Our software is affordable and easy to use – helping you do more with less.

MAINTENANCE

MaintenanceEdge™

MaintenanceEdge gives you the power to manage your facility with centralized requests, automated maintenance workflow, and simple reporting to protect your assets. Easy to implement and use, you'll extend the life of your buildings and equipment, decrease liability, and lower operating costs without any significant upfront investment.

InventoryEdge™

InventoryEdge has the tools that you need to streamline requesting, ordering, issuing, and tracking inventory. It organizes all these features into a single, web-based platform so that "business as usual" means having what you need when you need it.

Critical Alarm Automation™

Critical Alarm receives notifications, evaluates the content, removes duplicates and nuisance alarms, and automates the process of generating work orders based on the alarm priority.

Capital Forecast™

Capital Forecast provides quick and easy access to an inventory of structures and assets along with a record of their age and condition. By using this powerful modeling tool you can identify and assess what needs to be done and determine which is likely to prove a better return-on-investment.

ENERGY

UtilityTrac™

An energy management solution integrated with ENERGY STAR®, UtilityTrac is an affordable application that enables building owners to track, analyze, and report on utility consumption and cost.

FACILITY USAGE

Facility Schedule™
Facility Schedule is an online tool for managing facility usage requests and requirements, tracking event schedules, and accounting for usage expenses.

Facility Schedule Automation™
Facility Schedule Automation automates the management of building systems to support facility usage ensuring the comfort and reliability of your facilities.

GIS

Mobile311™
Mobile311 is a map-based GIS work order system that tracks location, time, type of work, and routes for crews in the field.

ConnectGIS™
ConnectGIS allows you to publish GIS data in a web portal for staff and citizens with quick search tools and ability to toggle layers and provide easy access to data.

SAFETY

Safety Center™
Safety Center is a mobile safety solution that allows you to easily publish safety procedures, send push notifications and track incident reporting for your organization.
